

MINUTES OF SOFTWARE MEETING

Date : 19-12-2024

Time : 01.30 pm

Attendees:

1. Mr. Santhosh Antony
2. Ms. Kavitha K M
3. Ms. Milby Baby
4. Ms. Sneha Sebi
5. Mr. Arun M R
6. Ms. Rakhi V M

MINUTES OF THE MEETING

The meeting commenced at 1:30 PM with an introductory session, highlighting the suggestions discussed in the previous meeting. The completed and ongoing tasks are as follows:

1. Created separate list for branch-specific and inter-branch records in test-wise bills.
2. Associated the histopathology tag name with the relevant test records for accurate identification.
3. Implemented sorting functionality for the histopathology certify page based on biopsy/cytology numbers.
4. Integrated the new version of the machine interface at the Piravom, Thrippunithura, NF Gate, Thiruvankulam, and Vaikom branches.
5. The host-off issue at the Thrippunithura branch has been rectified.
6. The issue of histopathology report tag names breaking and overlapping with the footer has been resolved.

Points Discussed:

1. The provision for Excel download is needed on the histopathology certification page.

2. Petty cash denominations, similar to those in F2, are needed.
3. Inactive users should not be displayed in the approval section.
4. For sample transfer receive, ensure that the filtering options persist.
5. In the sample handover report, display only the list of transferred tests for the selected branch.
6. In the sample handover, automatically populate the "specimen" field based on the selected test, instead of providing a manual entry column.
7. In the sample handover report, provide an option for bulk entry or common editing of sample receive time and temperature for the list. This functionality should be available either in this report or in the sample packet receipt section.
8. Add a column to enter results, along with an export option for the list.
9. A branch-wise transferred test list download or print option is needed in the test transfer section.
10. The entire reporting format and operation will be updated to include "method" as a new field and to accommodate a provision for generating both comprehensive and simplified reports. A dedicated meeting will be scheduled to discuss this matter.

The meeting concluded with a discussion of all the points, and a follow-up meeting has been scheduled.
